

From Fundamentals to Real-World Implementation

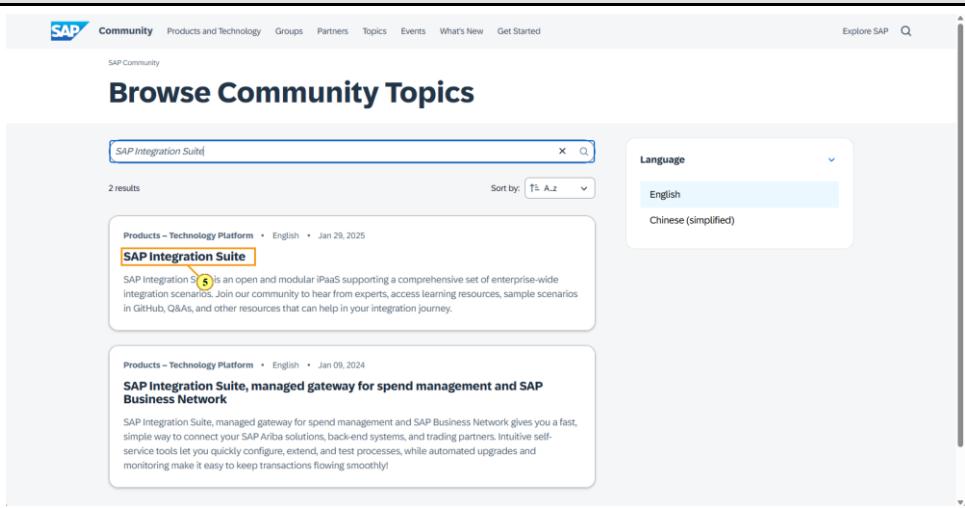

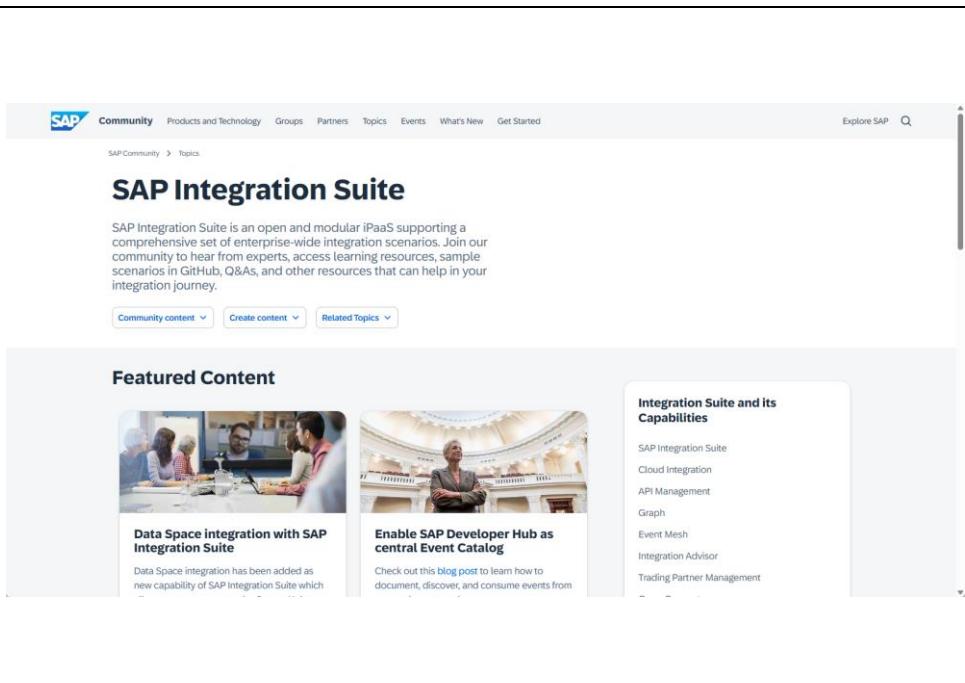

Explanation	Screenshot
<p> In this exercise, you will explore from fundamentals to real-world implementation.</p> <p> In the following steps, you will explore feature scope description.</p> <p> Note: You will navigate in your web browser to: help.sap.com.</p>	
<p>1. Choose <i>Document Outline</i>.</p>	

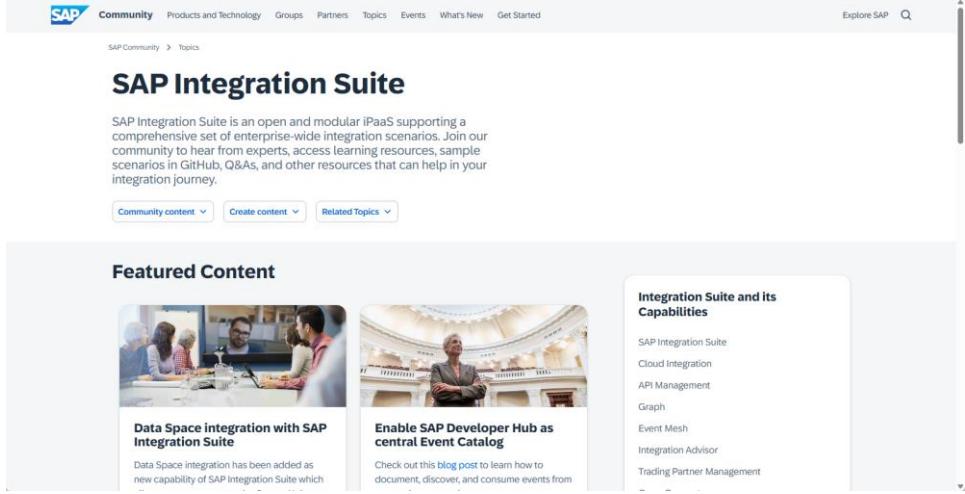

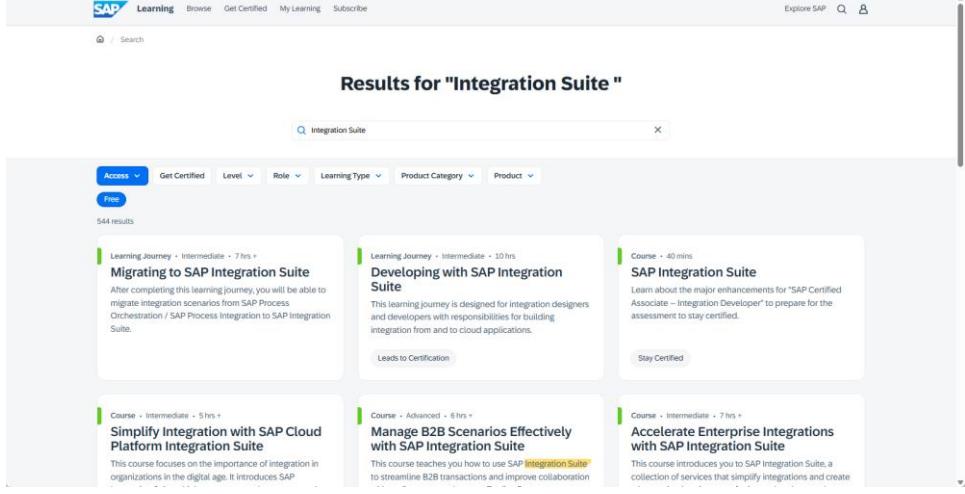

Explanation	Screenshot
<p>2. To expand the <i>Feature Scope Description for SAP integration Suite</i> pane, choose the arrow.</p>	
<p>(i) Note: The PDF provides an overview of SAP Integration Suite, useful for planning, audits, and workshops. It covers key components like Cloud Integration, API Management, and Event Mesh, along with feature availability by license type and versioning.</p>	
<p>(i) In the following steps, you will explore the SAP Help Portal - Integration Suite documentation.</p> <p>(i) Note: You will now navigate in your web browser to: SAP Integration Suite SAP Help Portal.</p>	

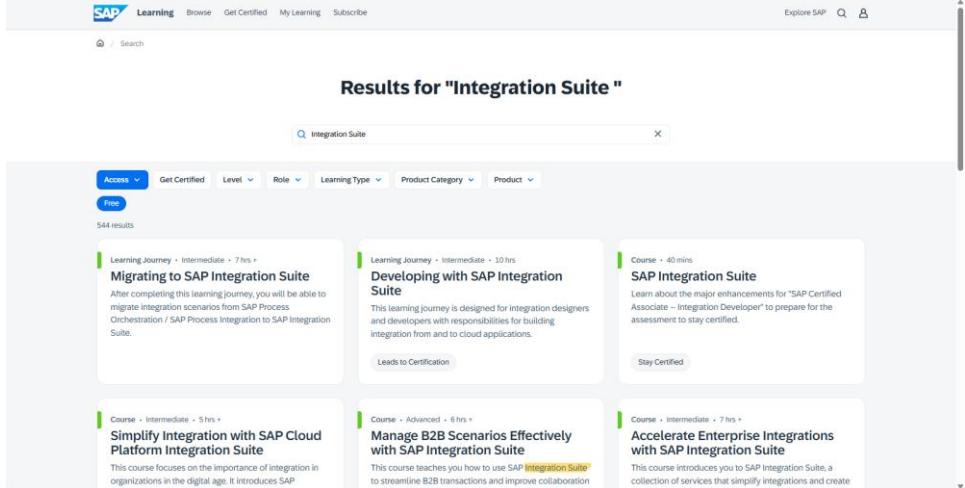

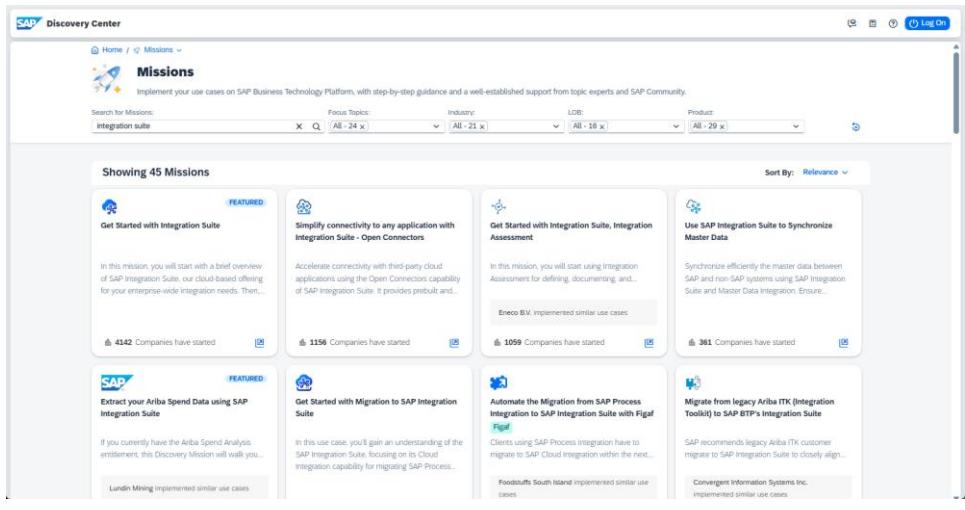

Explanation	Screenshot
<p> Note: This is the main entry point for the official product documentation of SAP Integration Suite. It provides comprehensive technical guidance, including service overviews, setup instructions, security configuration, and references to supported protocols and APIs. The portal is regularly updated to reflect changes and enhancements in the platform.</p>	
<p> In the following steps, you will explore the SAP Discovery Center – Integration Suite service catalog.</p> <p> Note: You will navigate in your web browser to: SAP Discovery Center Service - Integration Suite.</p>	

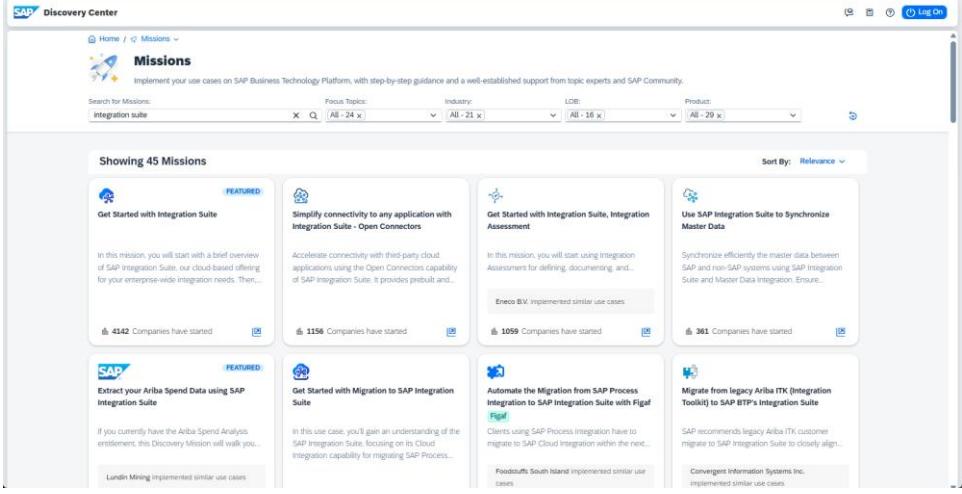

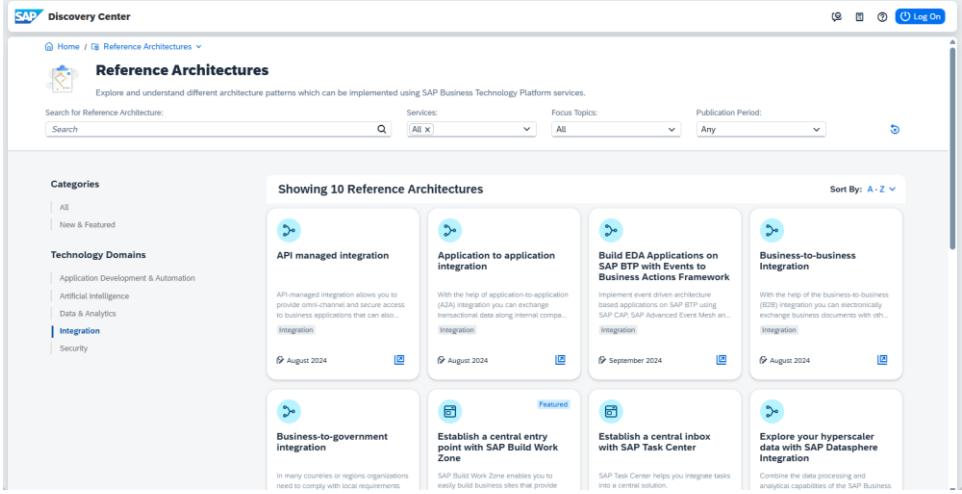

Explanation	Screenshot
<p><i>(i)</i></p> <p>Note: This page offers a detailed look at the SAP Integration Suite as a managed service on SAP Business Technology Platform. It includes descriptions of service capabilities, pricing plans, consumption models, entitlements, and links to associated missions (hands-on projects). It helps users understand what the service offers and how it fits into BTP-based architectures.</p>	
<p><i>(i)</i></p> <p>In the following steps, you will explore the SAP Community - Integration Suite topic page.</p> <p><i>(i)</i></p> <p>Note: Navigate in your web browser to: Integration - SAP Community and explore the SAP Community for Integration Suite Topics.</p>	

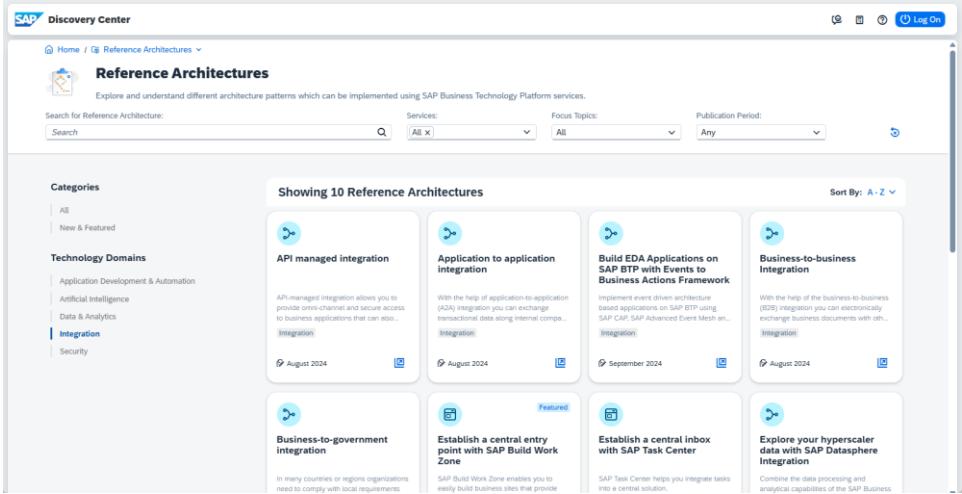

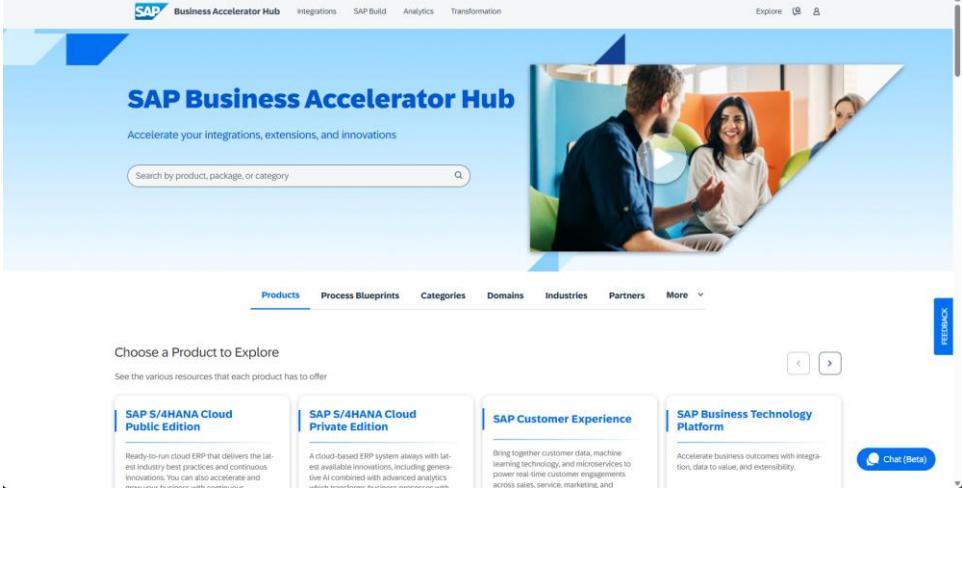

Explanation	Screenshot
<p><i>(i)</i></p> <p>Note: If you do not have an SAP Universal ID you can create one, or Enter your login credentials if you are an existing member.</p>	 <p>The screenshot shows a modal window titled "SAP Universal ID - New Login experience". It explains that SAP Universal ID provides a unified account linking multiple accounts, making switching easier. It includes links to "Learn more" and "Get support". Below the modal, there's a form to "Upgrade your account to SAP Universal ID!" with fields for First Name, Last Name, SAP Universal ID E-mail, Country/Region, and Password. To the right, there's a link for users who already have a SAP Universal ID to "Already got a SAP Universal ID?".</p>
<p>3. Choose Topics.</p>	 <p>The screenshot shows the SAP Community "Integration" group page. The "Topics" tab is highlighted with a yellow box and a circled number "3". The page displays a green puzzle piece icon, the group name "Integration", and a brief description: "Join the Integration group to connect with a collaborative community of integration developers and dive deep into integrating applications, data, managing the lifecycle of APIs, and more to accelerate innovation". It shows 665 members, an open group status, and a creation date of Jan 15, 2025. Below the header, there are sections for Discussions (13), Blog Posts (100), and Events (15). A "Featured Topics" section includes cards for "Welcome to the Integration Group", "Your Path to Certification", and "February Developer Challenge".</p>
<p>4. In the <i>Filter Topics</i> field, enter SAP Integration Suite.</p>	 <p>The screenshot shows the SAP Community "Browse Community Topics" page. A search bar at the top is highlighted with a yellow box and a circled number "4", containing the text "Filter Topics SAP Integration Suite". Below the search bar, there are two topic cards: "ABAP Connectivity" (published on Mar 14, 2024) and "ABAP Development" (published on Sep 10, 2024). On the right side, there are filters for "Language" (set to English) and "Chinese (simplified)".</p>

Explanation	Screenshot
<p>5. Choose SAP Integration Suite.</p>	 <p>The screenshot shows the SAP Community Topics page. A search bar at the top contains the text "SAP Integration Suite". Below the search bar, it says "2 results". There are two cards displayed. The first card is titled "SAP Integration Suite" and has a timestamp of "Jan 29, 2025". The second card is titled "SAP Integration Suite, managed gateway for spend management and SAP Business Network" and has a timestamp of "Jan 09, 2024". A language dropdown menu on the right side of the screen shows "English" selected.</p>
<p>(i) Note: This community hub aggregates user-generated content, blog posts, Q&A, learning resources, and event information related to SAP Integration Suite. It's a valuable resource for staying up to date with new features, solving real-world implementation issues, and networking with peers and SAP experts.</p>	 <p>The screenshot shows the SAP Integration Suite topic page. At the top, there is a navigation bar with links for Community, Products and Technology, Groups, Partners, Topics, Events, What's New, and Get Started. Below the navigation bar, the title "SAP Integration Suite" is prominently displayed. A brief description of the topic follows, mentioning it is an open and modular iPaaS supporting a comprehensive set of enterprise-wide integration scenarios. Below the description, there are three buttons: "Community content", "Create content", and "Related Topics". Further down, there is a section titled "Featured Content" with two cards: "Data Space integration with SAP Integration Suite" and "Enable SAP Developer Hub as central Event Catalog". To the right, there is a sidebar titled "Integration Suite and its Capabilities" listing various capabilities: SAP Integration Suite, Cloud Integration, API Management, Graph, Event Mesh, Integration Advisor, and Trading Partner Management.</p>

Explanation	Screenshot
<p> In the following steps, you will explore the SAP learning - Integration Suite learning journey.</p> <p> Note: You will navigate in your browser to Search topics, products, certifications... and explore the free learning.sap.com website.</p>	
<p> Note: This page offers free, self-paced learning content for SAP Integration Suite. Includes tutorials, guided courses, and certification prep. Covers core topics like message flows, adapters, API policies, and event-driven architectures. Learners can earn badges and prepare for SAP Certifications.</p>	

Explanation	Screenshot
<p>(i) In the following steps, you will explore the SAP Discover Center - Mission catalog.</p> <p>(i) Note: Navigate in your web browser to: https://discovery-center.cloud.sap/missionCatalog/?search=integration-suite https://discovery-center.cloud.sap/missionCatalog/?search=integration-suite SAP Discovery Center - Missions and explore the integration suite missions.</p>	 <p>The screenshot shows the SAP Learning platform results for 'Integration Suite'. It displays several mission catalog items:</p> <ul style="list-style-type: none"> Migrating to SAP Integration Suite (Learning Journey, Intermediate, 7 hrs) Developing with SAP Integration Suite (Learning Journey, Intermediate, 10 hrs) SAP Integration Suite (Course, 40 mins) Simplify Integration with SAP Cloud Platform Integration Suite (Course, Intermediate, 5 hrs) Manage B2B Scenarios Effectively with SAP Integration Suite (Course, Advanced, 6 hrs) Accelerate Enterprise Integrations with SAP Integration Suite (Course, Intermediate, 7 hrs)
<p>(i) Note: A curated collection of hands-on "missions" offering guided implementation paths for SAP Business Technology Platform services. For integration scenarios, it provides best practices, prebuilt content, and step-by-step instructions for services like SAP Integration Suite, Event-Mesh, and API Management. Each mission includes links to GitHub repositories, tutorials, and configuration guides.</p>	 <p>The screenshot shows the SAP Discovery Center 'Missions' section. It displays a grid of missions:</p> <ul style="list-style-type: none"> Get Started with Integration Suite (FEATURED) Extract your Ariba Spend Data using SAP Integration Suite (FEATURED) Get Started with Migration to SAP Integration Suite Automate the Migration from SAP Process Integration to SAP Integration Suite with Figi Get Started with Integration Suite, Integration Assessment Use SAP Integration Suite to Synchronize Master Data Get Started with Open Connectors Migrate from legacy Ariba ITK (Integration Toolkit) to SAP BTP's Integration Suite

Explanation	Screenshot																																				
<p><i>(i)</i> In the following steps, you will explore Reference Architecture - Integration.</p> <p><i>(i)</i> Note: You will now navigate to: SAP Discovery Center Search - integration and click on the Reference Architectures tab to explore Reference Architectures for Integration scenarios.</p>	 <p>The screenshot shows the SAP Discovery Center interface under the 'Missions' section. It displays a grid of 45 missions related to SAP Integration Suite. Each mission card includes a thumbnail, title, brief description, and the number of companies that have started it. For example, 'Get Started with Integration Suite' has 4142 companies started, and 'Extract your Ariba Spend Data using SAP Integration Suite' has 1156 companies started.</p>																																				
<p><i>(i)</i> Note: A catalog of validated reference architectures tailored to real-world integration use cases. Each entry includes architectural diagrams, technical components, and guidance for implementing integration patterns across hybrid and cloud landscapes using SAP Business Technology Platform services. Useful for planning scalable and secure architectures.</p>	 <p>The screenshot shows the SAP Discovery Center interface under the 'Reference Architectures' section. It displays a grid of 10 reference architectures. Each card includes a thumbnail, title, brief description, and the date it was published. Categories listed on the left include All, New & Featured, Application Development & Automation, Artificial Intelligence, Data & Analytics, Integration, and Security.</p> <table border="1"> <thead> <tr> <th>Category</th> <th>Architecture Type</th> <th>Description</th> <th>Published Date</th> </tr> </thead> <tbody> <tr> <td>All</td> <td>API managed integration</td> <td>API-managed integration allows you to provide omni-channel and secure access to business applications that can also...</td> <td>August 2024</td> </tr> <tr> <td>All</td> <td>Application to application integration</td> <td>With the help of application-to-application (A2A) integration you can exchange transactional data along internal comp...</td> <td>August 2024</td> </tr> <tr> <td>All</td> <td>Build EDA Applications on SAP BTP with Events to Business Actions Framework</td> <td>Implement event-driven architecture based applications on SAP BTP using SAP CAP, SAP Advanced Event Mesh an...</td> <td>September 2024</td> </tr> <tr> <td>All</td> <td>Business-to-business Integration</td> <td>With the help of business-to-business (B2B) integration you can electronically exchange business documents with o...</td> <td>August 2024</td> </tr> <tr> <td>New & Featured</td> <td>Business-to-government integration</td> <td>In many countries or regions organizations need to comply with local requirements</td> <td>August 2024</td> </tr> <tr> <td>New & Featured</td> <td>Establish a central entry point with SAP Build Work Zone</td> <td>SAP Build Work Zone enables you to easily build business sites that provide</td> <td>September 2024</td> </tr> <tr> <td>New & Featured</td> <td>Establish a central inbox with SAP Task Center</td> <td>SAP Task Center helps you integrate tasks into a central solution</td> <td>August 2024</td> </tr> <tr> <td>New & Featured</td> <td>Explore your hyperscaler data with SAP Datasphere Integration</td> <td>Combine the data processing and analytical capabilities of the SAP business</td> <td>August 2024</td> </tr> </tbody> </table>	Category	Architecture Type	Description	Published Date	All	API managed integration	API-managed integration allows you to provide omni-channel and secure access to business applications that can also... Explanation	Screenshot
<p> In the following steps, you will explore the SAP Business Accelerator hub.</p> <p> Note: You will now navigate to: https://api.sap.com/ and explore under the Integration Tab all possible Integrations artifacts.</p>	
<p> Note: The central API and integration content catalog from SAP. It allows users to discover, test, and consume APIs, integration packages (iFlows), events, and Open Connectors. Designed to support integrations between SAP (for example, SAP S/4HANA, SAP SuccessFactors) and non-SAP systems. Includes live API testing, sandbox access, and extensive metadata.</p>	

Explanation	Screenshot
<p> You have now successfully explored from fundamentals to real-world implementation.</p>
